

Design

Projects transforming the world.

As a designer you will design our habitat: an aesthetic experience that is hybrid and contemporary, innovative and sustainable.

You will learn to master the main techniques of graphic representation, from sketching to the most advanced virtual reconstructions, in order to be an all-round designer and work with both the craftsman and the big industry, creating both single objects and entire product lines.

You will design habitats, guiding tastes and trends. You will become the interpreter of the community in which you live, contributing to its deeper meaning, with attention to the circular economy and environmental sustainability.
