traineeship /placement application (form)

1) GENERAL INFORMATION

Purpose

The Erasmus +traineeship (Placement) program allows students from Institutions with the ECHE (Erasmus Charter for Higher Education 2017 - 2021), to spend a traineeship/ placement mobility period, i.e. training through work, in companies, training centers, research centers, professional studios, art centers or other organizations in one of the Program Countries. The program foresees a financial contribution to cover part of the expenses that the students will have abroad during their traineeship/ placement period.

The Erasmus + Program allows students to experience cultural, work and training experiences abroad, to meet young people from other countries, thus actively participating in the process of European integration.

The mobility must be compatible with the student's academic curriculum and with his/her personal aspirations.

Blended mobility

The mobility can start in a virtual mode (remotely).

The activities must be consistent with the objective of the mobility, such as "distance learning" activities (virtual training, etc.). This mobility will have to be combined with a physical mobility abroad component, when it will be possible to do so again.

In the case of a virtual mobility (remote), or a virtual mobility completed in presence (blended mobility), Financial support will be provided in the manner that will be communicated by the European Commission and the Erasmus + INDIRE National Agency.

During the virtual mobility students won't receive any Erasmus+ grants.

Digital Opportunity Traineeship

The European Commission intends to promote traineeship opportunities aimed at acquiring digital skills in all disciplines (e.g. application development, software, scripts, websites, data analysis, cyber security, cloud computing, quantum and artificial intelligence, etc.).

Organizations for traineeship/ placement mobility

The body / organization where the student intends to carry out the traineeship must be a "company": *"any company in the public or private sector that carries out an economic activity, regardless of its size, legal status or economic sector of activity, including social economy"*.

This definition includes enterprises, training centers, research centers and other organizations.

In the case of an traineeship at Higher Education Institutes (eg: Academy or University laboratories), the activity carried out must be for professional training and NOT studies. The training activity must be clearly expressed in the work plan. Furthermore, teaching is NOT allowed as an traineeship.

Selecting a company

Finding a company for an "independent traineeship" means that the training project must be selected independently by the candidate (also with the collaboration of the lecturers or the Course Coordinator). Following the indication of the name of the company by the student, the Erasmus Office carries out support activities. Each lecturer will be able to offer support in finding companies in their own artistic field.

NB: the traineeships provided by Rome University of Fine Arts are independent traineeship based on the individual project of the students who, in collaboration with a lecturer or independently, select the host company. The Academy and the student sign an traineeship agreement (Training Agreement) before the mobility period abroad.
